A NEW ERA IN WIRELESS FIRE DETECTION

FIRECELL WIRELESS DUAL INPUT / OUTPUT UNIT

NEW LOW PRICE

Introducing the Next Gen I/O Unit

The new FireCell Wireless Dual Input / Output Unit represents the first release in the next generation of FireCell technology - a key milestone in the evolution of EMS wireless systems.

Developed from installer and engineer feedback, this latest I/O unit improves usability, enables faster installation, and boosts battery performance, while delivering trusted FireCell 'fit and forget' reliability at a new lower price.

Modern by design

The new Wireless Dual Input / Output Unit features a more refined, contemporary design, improving both usability and on-site appearance without compromising the durability expected from EMS.

Key updates

- 10 year CR123A battery life
- Installer focused updates
- Latest wireless technology
- Modern ergonomic design
- Backward & next-gen compatible
- Same EMS robustness

Why FireCell

- Trusted wireless technology
- Free underwritten wireless surveys
- Best-in-class UK support
- 5-year EMS warranty
- Fit & forget
