## Important Information

### FireCell Multisensor Detector

EMS is unable to supply the FireCell Multisensor Detector from the 1st February 2015.

Detectors already supplied and installed are unaffected. Our detector technology partner can no longer source a component that is required at the manufacturing stage.

EMS is able to continue to service existing multisensor products already deployed in existing systems.

In circumstances where a multisensor is required, EMS is pleased to be able to offer an alternative detector, manufactured by one of our other product partners, which is branded Ziton. This detector is fully compatible with the FireCell platform and integrates seamlessly into any scheme/application where a multisensor is required to satisfy an identified risk. The detector is certified to all relevant standards: EN54 5, 7, 25 and part 3\*. \* *Sounder variants only.*

This device will look slightly different to the current FireCell detector products.

To order these products, please use the following highlighted part numbers:

Product Description	New Part Number
Multisensor Detector Only	5-MSH
Wireless Base Only	FCZ-170-001
Wireless Sounder Base Only	FCZ-191-000
Wireless Sounder/Visual Indicator Base Only	FCZ-191-200

The EMS FireCell platform features a range of detectors, *including Optical and Heat derivatives*, for all applications and our commercial and technical teams can be contacted on 01227 369570 or email enquiries@emsgroup.co.uk for any further assistance.
