# Spa & Gym Panic Alarms

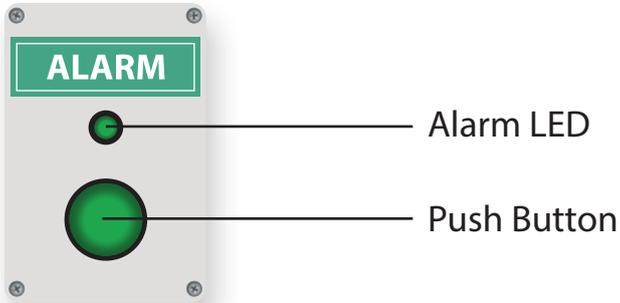

## Operating Instructions

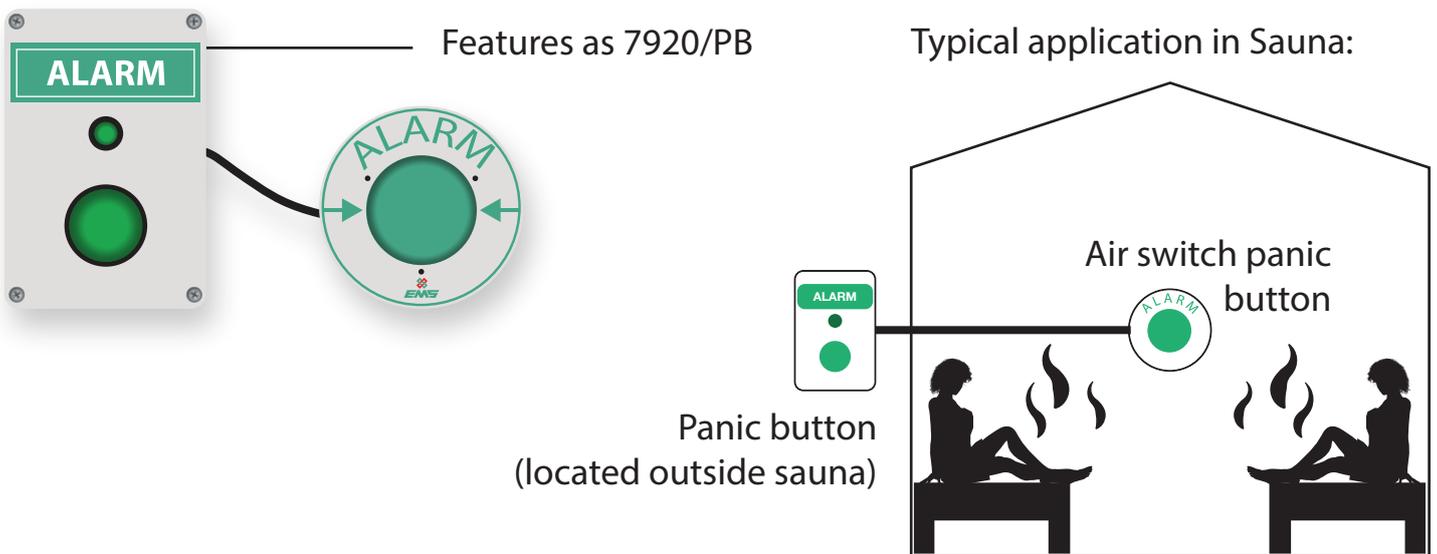

## Introduction

There are three variants of Spa & Gym Panic Alarms, all for use with the 7256 Iris+ Wireless Receiver. Available variants are shown below:

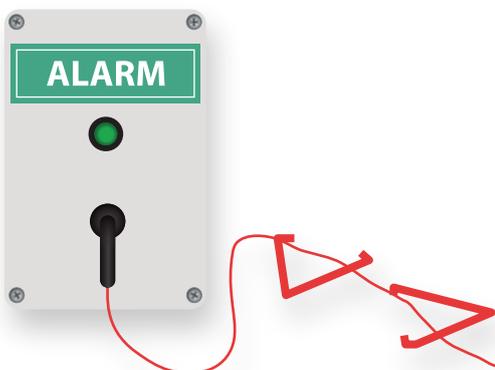

### Wireless Push Button Panic Alarm 7920/PB

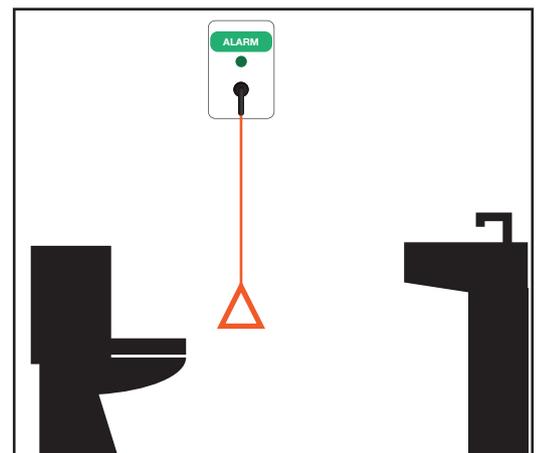

### Wireless Push Button Panic Alarm c/w Air Switch 7920/AS

### Wireless Pull Cord Panic Alarm 7920/PC

#### Typical application in WC:

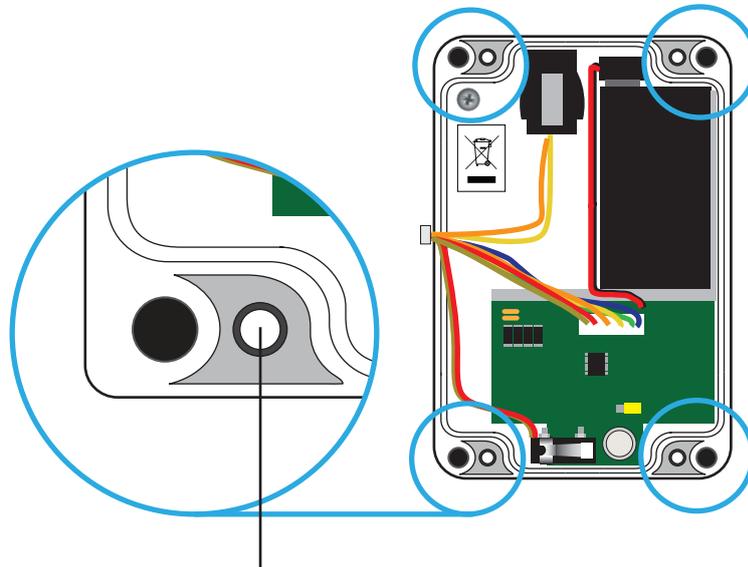

## Installation

### Remove lid

Loosen the four screws and separate the lid from the back box to expose the wall mounting holes.

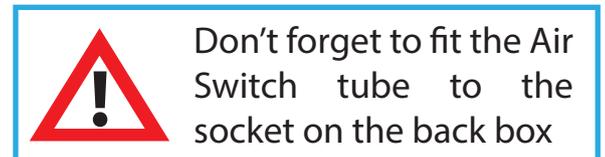

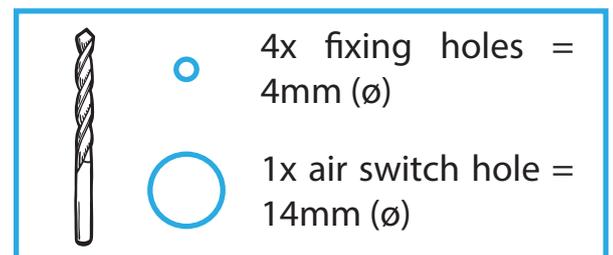

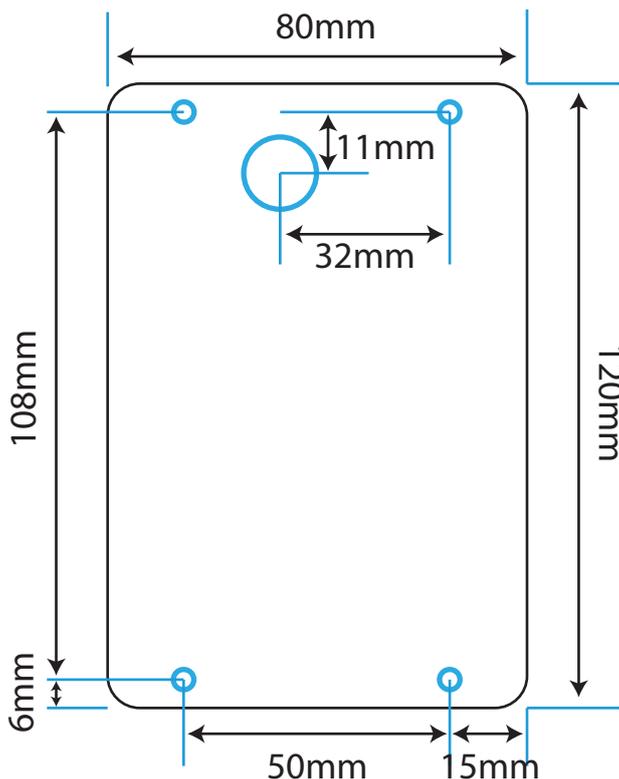

### Fix back box to wall

Use all four circled fixing positions, to ensure a firm fixing.

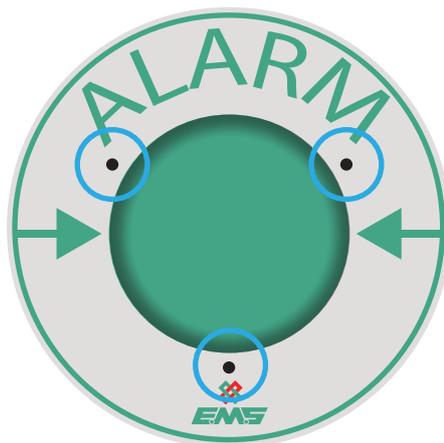

Fixing position location within cavity

**Note; if installing a device with air switch (7920/AS), an additional hole will need to be drilled to accommodate the device's air switch tube socket on the back of the box. See below.**

## Fix Air Switch to the wall

Use all three fixings to ensure a firm fixing.

## Power the device

Ensure all batteries are fitted, with the battery lead connected.

## Reassemble the device

Replace the four lid screws.

## Test the transmitter.

Check that a signal is received at the Iris+ receiver upon activation.

## Battery replacement.

The device is powered by 6x AAA Alkaline (Panasonic LR03AD Powerline / Varta 4003 Industrial) batteries

When replacing batteries; observe correct polarity, using only specified batteries.

It is also recommended that the device is re-tested to ensure correct operation.
