

# Wireless Zone Monitor (WZM)

### Installation Guide

#### Part no

EC-13-0000

#### **Product description**

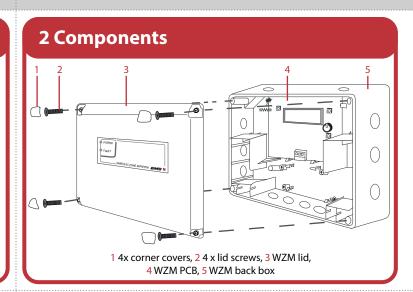

Wireless Zone Monitor

#### 1 Pre installation

Installation must conform to applicable local installation codes and should only be installed by a fully trained competent person.

- Ensure the WZM is installed as per the site survey.
- Refer to step 3 to ensure optimised wireless performance.
- Refer to the wireless zone monitor engineers guide (TSD143) for full programming details.
- This device contains electronics that may be susceptible to damage from Electrostatic Discharge (ESD). Take appropriate precautions when handling electronic boards.

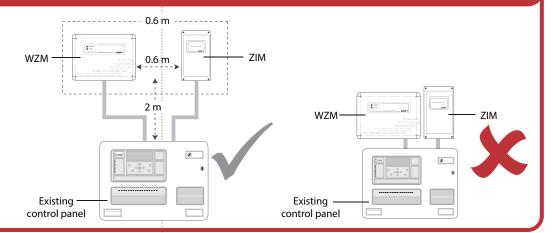

### 3 Mounting location guidelines

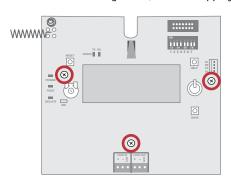

For optimum wireless performance, the following must be observed:

- The WZM and ZIM must be seperated by a minimum of 0.6 m.
- Ensure the WZM is not installed within 2 m of the control panel or any other wireless or electrical equipment.
- Ensure the WZM is not installed within 0.6 m of any metal work.

# **4 Optional PCB removal**

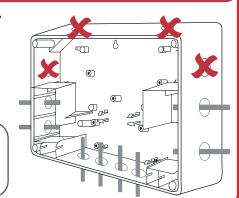

Remove the three circled retaining screws, before unclipping the PCB.

### 5 Remove cable entry points

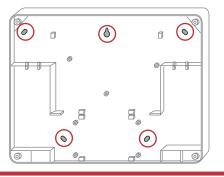

Drill the cable entry points as necessary.

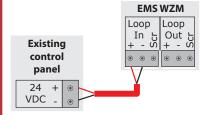

### 6 Fix to the wall

- All five circled fixing positions are available for use.
- The key hole can also be used for fixing and locating where required.

### **7 Connection wiring**

- Cables should only be passed via the access points available.
- Flame retardant cable glands must be used.
- DO NOT leave excess cable in the WZM.

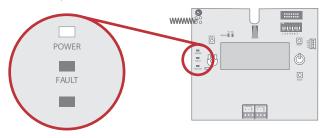

#### Note

If the WZM is to be powered from a seperate 24 VDC power supply, the power supply should be fault monitored. A wireless input / output unit can be used if required.

### **8 Apply power**

Apply power. The normal LED states for the WZM are as below:

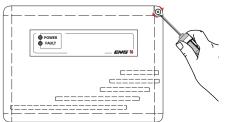

- Power LED green LED will be on.
- Fault LED yellow LED will be off.

Note: The isolate LED is not used on this product.

### 9 Close the WZM

- Ensure that the WZM PCB is correctly inserted and the PCB retaining screws are refitted.
- Refit the WZM lid, ensuring LEDs are not damaged by the light pipe when refitting.

Note: refer to the wireless zone monitor engineers guide (TSD143) for full programming details.

## **Specification**

**Operating temperature** -10 to +55 °C

**Storage temperature** 5 to 30 °C

**Humidity** 0 to 95% non-condensing

Operating voltage 17 to 28 VDC

Power requirements 17 mA at 24 VDC

IP rating IP54

Operating frequency 868 MHz

Output transmitter power 0 to 14 dBm (0 to 25 mW)

Signalling protocol X

**Dimensions** (**W** x **H** x **D**) 270 x 205 x 85 mm

Weight 0.95 kg

**Location** Type A: For indoor use

# **Regulatory information**

**Manufacturer** Carrier Manufacturing Poland Sp. z o.o.

Ul. Kolejowa 24. 39-100 Ropczyce, Poland

Year of manufacture See devices serial number label

Certification ( € 10

Certification body 0905

**CPR DoP** 0359-CPR-00436

**Approved to** EN54-18:2005. Fire detection and fire alarm systems.

Part 18:Input/output devices.

EN54-25:2008. Incorporating corrigenda September 2010 and March 2012. Fire detection and fire alarm systems.

European Union
Directives

EMS declares that this device is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: www.
