Date: 29 February 2024

Name: Daniel Griffin

Position: Director of Test & Compliance

A member of EMS Security Group Limited
Company Registered in England & Wales 917296 - address as above
VAT Group Reg No: GB 572 0384 49

Annex A

The Product Security and Telecommunication Infrastructure Act 2022 relates specifically to "Consumer Connected" devices. This is meant for products used domestically such as phones, Tablets and even domestic smoke alarms and security systems.

EMS products do not technically fall within this requirement as all EMS equipment is professionally installed and maintained and so not connected by the Consumer.

However all cyber security threats are taken seriously by EMS and Carrier and as such we endeavour to comply with these requirements regardless of their actual applicability.

The requirements for logging of incidents and maintenance of records of the Product Security and Telecommunication Infrastructure Act 2022 are fully covered by the Carrier web portal for clients

<https://www.corporate.carrier.com/product-security/reporting-response-disclosures/>

*SmartCell

The requirement for unique PIN access and password changing upon installation only applies to one product of the EMS product range the SmartCell CIE (as all other products do not have PIN/Password access). At present the SmartCell CIE has a unique PIN assigned at production and requests the end user to change upon receipt , further enhancement of this product are in progress where the PIN access will force the end user to change upon installation and first use.

Products covered by this declaration;
